

LEIDS UNIVERSITAIR MEDISCH CENTRUM

When you login, you must provide an extra security code. Depending on the chosen method, a code is received by e-mail or the Google Authenticator app can be used.

Login with your smartphone

To do this, you must indicate in Kl app that you no longer wish to receive a code by email, but by an Authenticator app on your phone.

- Log in through this link: <https://klapp.lumc.nl/>
- Click on **My Profile** (top right corner)
- Enter your current password (and leave the other 2 fields empty)
- Change Email to **Authenticator**
- Scan the QR code with the camera on your phone
- Follow the instructions on your phone
- Enter the security code that you received on your phone by the Authenticator app
- Click on Save

From now on you can login with the Authenticator app or change it back to Email.
